“TRAILER OR TRAY TOP MOUNTED FIRE FIGHTING UNITS” DESIGNED TO FIT A 6X4 TRAILER OR ON A TRAY TOP VEHICLE

(850 LITRE CAPACITY)

Similar units available with larger or smaller tanks

- Heavy duty chassis (75x50x3mm RHS) with two centre cross bracings under the tank
- 6x4 unit measures 1765 mm long, 945mm wide and 940mm overall height
- Provisions to bolt the unit to a tray @ Lifting points (Can be supplied with forklift provisions)
- Pump and hose reel mounted at rear of tank allowing flood suction (no priming required)
- Top section of frame can be taken off to allow tank removal
- Heavy duty purpose designed Chubb 36 meter x 19mm retractable fire hose and reel
(Reel is supported on both sides to give extra strength and has a rewind crank handle)
- Tank is galvanised with one baffle. We use proven and tough Denyer tanks
- All screwed hose fittings are of brass construction (not plastic or poly)
- All connecting hoses are of high pressure, UV resistant flexible materials
- All hoses are fitted with removable brass fittings
- Tank is insulated from frame to prevent corrosion or damage
- Unit is standard with a 5 ½ H/P petrol Honda Single impeller fighter
- Frame is finished in “powder coat” red (std) or Hot Dipped galvanised on request
- NB. Galvanised units have a different frame construction to allow for galvanising
- NB Multi suction available on request.
- NB All units can be order with personal alterations or additions
- Different pumps can be supplied
- Pumps can be ordered with electric start if required
- Accessories rake and axe holders can be fitted

Cost \$4580.00 inc GST

Add \$350.00 for multi suction valve and plumbing to tank

OUR AIM IS TO MEET YOUR REQUIREMENTS
