## “SLIP ON FIRE FIGHTING UNITS” DESIGNED TO FIT ACROSS A TRAY TOP VEHICLE (820 LITRE AND 540 LITRE CAPACITIES)

### **BOTH UNITS SHARE THE SAME STRUCTURAL AND DESIGN FEATURES**

- Heavy duty chassis with centre cross bracing and lifting points
- Provisions to bolt the unit to a tray
- Diagonal cross bracing at back of unit
- Top section of frame can be taken off to allow tank or motor removal
- Heavy duty 36 meter x 19mm retractable Chubb Mark 2 fire hose and reel  
(Reel is supported on both sides to give extra strength)
- Tank is galvanised with baffles. We use proven and tough Denyer tanks
- All screwed hose fittings are of brass construction (not plastic or ploy)
- All connecting hoses are of high pressure, UV resistant flexible materials
- All hoses are fitted with removable brass fittings
- Tank is insulated from frame to prevent corrosion or damage
- Non return valve in suction to limit air locks
- Unit is standard with a 5 ½ H/P petrol Honda Single impeller fighter
- Rear view from cabin has minimum obstruction
- Frame is finished in “powder coat” red (std)
- *NB All units can be ordered with personal alterations or additions*
- *Different pumps can be supplied and pumps can be ordered with electric start if required*
- *Accessories rake and axe holders can be fitted*

**Cost \$4378.00 inc GST (540 Litre) \$4698.00 (820 litre)**

**Add \$350.00 for multi suction valve and plumbing into tank**

**OUR AIM IS TO MEET YOUR REQUIREMENTS**
